## About this report

Witted gathers public information from the Nordic IT consulting market to analyze how companies in the industry are doing. We use open data sources to collect this information. The data is only indicative and bound to have inaccuracies due to the limitations in the available public data and our estimation methods.

We have gathered the most interesting IT consulting companies between the size of 30 and 1000 people from Finland, Norway, Sweden and Denmark. We produce reports on a monthly basis.

If you have any development ideas or comments, or would like to have your company included in or removed from the report, please contact us at [insights@witted.com](mailto:insights@witted.com).
